

eAP1.co.uk - the Digital AP1 Application – Stand Alone or Integrated.

What is eAP1.co.uk?

eAP1 is the digital version of the AP1 form powered by FormEvo, who provide the only cloud-based legal forms solution in the UK that is independent from case/practice management and search providers but is easily integrated with their solutions.

eAP1 validated data means fewer requisitions

Fewer requisitions

Faster

eAP1 is faster than HMLR's own portal

eAP1 is instantly recognisable as it mirrors the AP1

Instantly recognisable

Auto populates 94% validated data

eAP1 auto populates from SDLT/LTT or case/practice management solution including land address and seller's name

eAP1 includes auto calculation of fees, reducing the incidence of human error

Auto calculation

HMLR electronic submission

eAP1 enables HMLR electronic submission

eAP1 provides you with a view "at a glance", status updates and instant email alerts

Status updates

Save draft, amend, resubmit

eAP1 enables you to save drafts, then easily amend or submit them

Why cloud-based?

FormEvo's cloud-based forms library **replaces** the traditional on-premise forms applications which rely on your IT department or users to download software and content updates. This means that new and updated forms can be quickly added and replaced in the cloud-based library for all subscribers to access immediately.

Why independent?

With FormEvo and eAP1, you have the choice of stand alone forms provision or integrated. We are independent of - but easily integrated with the majority of - case/practice management and search providers' solutions via our comprehensive API and common field names. This means forms are auto populated and saved quickly back to the matter file.

See www.formevo.co.uk/how

Forms are all that we do, so our focus is always on developing electronic and digital forms that are easy to use, innovative, flexible and help you to complete forms faster. Many of our clients are early adopters of this technology and we have been supporting them with eAP1 since 2017, long before HMLR mandated the move.

eAP1 powered by FormEvo, the only cloud-based forms solution in the UK that is independent from case/practice management and search providers but is easily integrated with their solutions.

The UK Government's "Digital by Default" policy is driving legal firms to review their forms provider. No longer are the traditional on-premise forms applications fit for purpose.

The FormEvo cloud-based forms library is the solution that will smooth the transition from paper to electronic to digital forms and future-proof your firm as we are propelled towards digital eSubmission.

Long before HM Land Registry confirmed that from November 2022 they will no longer accept scanned copies or uploaded PDF applications to change the register, eAP1.co.uk powered by FormEvo was already providing the most comprehensive and secure, electronic AP1 form – eAP1.co.uk.

eAP1.co.uk is faster to complete than the HMLR's own portal, with up to 94% pre-populated from your SDLT or LTT submission, with validated data. You can save drafts, easily resubmit or amend, view "at a glance" status updates and get instant email alerts.

On screen, eAP1.co.uk is instantly recognisable, mirroring the paper AP1. It's easy to use, innovative and flexible so helps you complete the form faster:

- from data stored in your systems
- by recycling transaction data from your SDLT/LTT submissions, being the pre-requisite to an AP1.

Auto population of the land address and sellers name, auto-calculation of fees, validation of data – mean fewer requisitions are raised, and eAP1.co.uk provides the all important HMLR electronic submission.

Today's key requirements around collaboration, client journey experience, data security, adaptable third-party integrations and return on investment (ROI) are all achieved with FormEvo forms and its comprehensive API. This, combined with transparent, consistent and fair pricing based on your actual number of combined successful SDLT/LTT eAP1 submissions, makes FormEvo the only forms solution you'll need to support your firm now and into the future.

FormEvo has over 450 clients across the UK – twenty-five in the Top 200 – and has enabled five million+ digital forms eSubmissions since 2007.

The core benefits of the standard edition of FormEvo include:

Form bundling

- Work on multiple forms
- Add in guidance notes and other documents
- Data transfer between forms
- Save, send and print one file
- eSign several places, but all in one 'envelope'

Digital submissions

- Send forms digitally from within FormEvo
- Receive a faster response
- Validation functionality reduces the chance of a form being rejected
- Lower the cost of completing forms
- Copy data from one government portal to another

Form collaboration

- Over 2000 legal forms
- Enables remote working
- Reduced demand on your IT department
- Instantaneous forms updates/developments
- 2FA + eSign (PAYG £2.50) per matter

Automation

- Financial calculations and figures work between forms
- Practice and Court details pre-population
- Commonly used clauses, covenants and other wording enabled
- Cutting down data input time by auto-transferring data between linked forms

User or form centric pricing

- Transparent and consistent price policy across all FormEvo customers
- Standard forms based on active users per month, or forms used
- Digital submissions are charged on a per transaction basis
- Cost aligned with your firm's ROI

Form expandability

- Duplicating pages
- Expandable text boxes
- Adding rows to tables in schedules
- Expanding rows retain auto calculate function
- Attestation clauses can be edited

Cloud-based forms library

- Share forms digitally
- Collaborate with colleagues, clients and the 'other side'
- Form audit trail
- Creates a paper-light process

GDPR/Cyber compliance

- Full audit trail on all forms
- GDPR Toolkit to identify and delete client based personal data
- Ability to mark forms as confidential to limit who can view a form within your practice
